DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

**Project Certificate**

It is my pleasure to certify that Mr. Akshat Suwalka has worked with me on the project "Classification of Blood vessels leaking time in an Eye from Retinal Images" during May 2020 to August 2020. As part of the project he developed deep learning algorithms for classification of retinal images into various categories of retinopathy. He demonstrated a strong knowledge of deep learning. He is very good at analytical problem solving as well as system development.

Akshat is an intelligent and hardworking student. He is motivated and eager to pursue research. He is responsible and always enthusiastic to contribute to new projects.

Best regards,

**Pabitra Mitra**

Professor

Computer Science and Engineering

IIT Kharagpur
